

Newton Enterprise Program

Governed AI Substrate Licensing for Regulated and High-Reliability Environments

Newton Enterprise provides organizations with a fully governed, deterministic AI substrate designed for regulated industries, mission-critical workflows, and large-scale deployments. Enterprise licensing includes expanded Knowledge Packs (KPs), full governance tooling, multi-device audit continuity, and dedicated support channels.

Newton Enterprise is engineered for sectors where AI behavior must be predictable, auditable, and constitutionally constrained — including law, medicine, finance, automotive, industrial automation, and public-sector systems.

1. Enterprise Licensing Overview

Newton Enterprise licensing includes:

- Full Newton Substrate (c-Core, GEACK, KIL, Safeguards, Audit Layer)
- Newton PA Enterprise Edition
- Newton Link Layer (NLL) for all supported LLMs
- Expanded Vertical Knowledge Packs (Law, Medical, Finance, Engineering, Governance)
- Enterprise KP Marketplace Access
- Multi-Signature Governance Controls
- Session Sync for cross-device continuity
- Full audit trace retention
- Enterprise-grade support and SLA options

Enterprise licensing is available on a **per-seat**, **per-device**, or **per-organization** basis.

2. Enterprise Pricing

Evaluation License

For regulated organizations evaluating Newton for internal deployment.

- **\$25,000** — 90-day evaluation
- Includes 10 seats
- Includes 3 vertical KPs
- Includes full substrate + PA Enterprise

- Includes technical onboarding
- Includes audit tooling
- No production deployment allowed

Enterprise Seat Licensing

For organizations deploying Newton to employees or internal teams.

- **\$20 per seat per month**
- Minimum 50 seats
- Includes all core KPs
- Includes governance tooling
- Includes audit retention
- Includes Session Sync
- Includes Newton PA Enterprise

Enterprise Device Licensing (OEM / Hardware)

For OEMs shipping Newton on consumer or enterprise devices.

- **\$4 per device** (consumer)
- **\$12 per device** (enterprise)
- Includes Newton Substrate
- Includes deterministic validation
- Includes audit trace
- Includes OEM branding options
- Includes Session Sync

Enterprise Vertical KP Licensing

Vertical KPs (Law, Medical, Finance, Engineering, Automotive, Industrial)

- **\$2,000 per KP per month**
- Or **\$18,000 annual**
- Includes updates
- Includes governance review
- Includes domain-specific primitives
- Includes compliance pathways

Enterprise Custom KP Development

Custom KP design for regulated workflows.

- **\$50,000 – \$250,000** depending on domain
- Includes primitive lattice design
- Includes domain governance modeling
- Includes compliance validation
- Includes deployment support

3. Enterprise Rules & Obligations

3.1 Deterministic Governance Requirement

All Enterprise deployments must run Newton's constitutional substrate without modification. No organization may alter:

- c-Core
- GEACK
- Safeguards
- Constitutional invariants
- Drift-prevention logic

3.2 Audit Retention

Enterprise customers must retain audit logs for:

- **3 years** (standard)
- **7 years** (regulated industries)

Audit logs must remain accessible for compliance review.

3.3 Multi-Signature Governance

Any rule changes, KP updates, or domain expansions require:

- Two human signatures
- One Newton governance signature
- One audit-layer verification

This prevents unilateral rule modification.

3.4 No Silent Updates

Newton Enterprise prohibits silent rule changes. All updates must be:

- Logged
- Versioned
- Audited
- Approved by governance

3.5 Domain Safety Enforcement

Vertical KPs must operate within their domain boundaries. Newton will block:

- Cross-domain reasoning
- Unauthorized legal advice
- Unauthorized medical diagnosis
- Unsafe engineering outputs
- Unbounded financial recommendations

3.6 LLM Independence

Enterprise customers may use any LLM, but Newton must remain the pre-inference governor.

4. Enterprise Support & SLA

Standard SLA

- 24-hour response
- 99.9% uptime
- Monthly governance updates
- Quarterly KP updates

Premium SLA

- 4-hour response
- Dedicated Newton engineer
- Custom KP tuning
- Compliance review support
- Annual governance audit

5. Enterprise Deployment Models

On-Device

Newton runs locally with zero network dependency.

On-Premise

Newton deployed inside customer infrastructure.

Air-Gapped

Newton deployed in isolated environments for defense, medical, or critical systems.

OEM Embedded

Newton pre-installed on hardware at manufacturing time.

6. Enterprise KP Marketplace

Enterprise customers receive access to expanded vertical KPs:

- Law KP
- Medical KP
- Finance KP
- Engineering KP
- Automotive KP
- Industrial KP
- Governance KP
- Compliance KP
- Risk KP

Each KP includes 150–300 primitives and produces 6.3M–12.6M deterministic answer shapes.

7. Enterprise Summary

Newton Enterprise provides:

- Deterministic AI
- Constitutional governance
- Full auditability
- Domain-safe reasoning

- Multi-LLM compatibility
- OEM-ready deployment
- Regulator-ready documentation
- Enterprise-grade support

Newton Enterprise is the governed AI substrate for organizations that cannot afford probabilistic behavior.
